EXPERIENCE

CAYUSE, Remote   11/2025 - Present

Cloud-based research management

Contract UX Designer

- Collaborate with designs and stakeholder to update designs for one of the company's flagship products called iRIS.
- Utilize Figma to create wireframe deliverables and designs.

COBBLESTONE SOFTWARE, Lindenwold, NJ   11/2023 - 10/2025

Contract, vendor, and e-procurement management software, SaaS.

UX Designer

- Collaborated with stakeholders and developers to design new and existing features for a contract management & procurement software called Contract Insights.
- Utilized Figma to create wireframe deliverables and designs.
- Led the redesign process for an external gateway portal module (called the "vendor client gateway").

BUXTON, Remote   6/2022 - 10/2022

Retail Customer Analytics, SaaS

Product Designer

- Worked within the company's product team to design multiple new products for stakeholder review and eventual public release.
- Utilized Figma to create wireframe deliverables and finalize existing designs.
- Helped centralize design system in a singular ecosystem to create a more cohesive design system going forward with new products.

LENELS2, Pittsford, NY   6/2021 - 12/2021

Advanced physical security solutions, access control, video surveillance and mobile credentialing.

Product Designer

- Worked within a continuous delivery environment on a team of designers and developers.
- Collaboratively engaged with stakeholders to deliver features and functionality for an all-in-one cloud-managed security solution called Elements.
- Led the design process from start to finish for a new guest access feature for Elements.
- Wrote testing script, created designs, and conducted AB testing for a video security solution. Utilized ProtoPie for its deep interaction capabilities and published results to confluence.
- Wrote script and conducted user interviews for internal use. Published results to confluence, presented them to stakeholders, and provided next steps.
